~~Activity: Bird Beak Adaptation Lab~~

An adaptation is a characteristic that helps a plant or animal survive in its environment. Bird beaks have adapted for many things such as eating, defense, feeding young, gathering nesting materials, building nests, preening, scratching, courting and attacking. The size and shape a beak is specific for the type of food the bird gathers.

~~bird beak adaptation lab — Environmental Science~~

Activity: Bird Beak Adaptation Lab . Goal: To learn about the advantages and disadvantages of variations, by simulating birds with different types of beaks competing for various foods.
