The use of
drivers in
Blender 2.5
changed
significantly
from previous
versions. Now,
almost every
property in
Blender can be
animated,
driven, and used

Acces PDF

Blender 2 5

as a driver for other properties. It's just a matter of right-clicking over the property that you want to control and selecting Add Driver, then setting it up on the Graph Editor window. You can

Acces PDF

Blender 2 5

even make
complex drivers
using scripted
expressions that
can take into
account more
than one
property and
math
expressions, for
example.
