Pulitzer Prize winner Sylvia Plath's complete poetic works, edited and introduced by Ted Hughes. By the time of her death on 11, February 1963, Sylvia Plath had

written a large bulk of poetry. To my knowledge, she never scrapped any of her poetic efforts. With one or two exceptions, she brought every piece she worked on to some final form acceptable to her, rejecting at most

the odd verse, or a false head or a false tail. Her attitude to her verse was artisan-like: if she couldn't get a table out of the material, she was quite happy to get a chair, or even a toy. The end product

poetry works always in a contrary direction: showing what man and beast have in common, the reservoir from which we all draw. In *A Ted Hughes Bestiary*, Alice Oswald's selection is arranged chronologically,

with an eye to different books and styles, but equally to those poems that embody animals rather than just describe them. Some poems are here because, although not strictly speaking animal, they become

so in the process of writing; and in keeping with the bestiary tradition there are plenty of imaginary animals—all concentratedly going about their business. In *Poetry in the Making*, Hughes said that he thought
