Dental Laboratory Procedures: Removable partial dentures ...

For the laboratory construction of the removable partial denture following steps should be kept in mind: Presence of a properly prepared and articulated master cast. A diagnostic cast with a neat and specific design carefully drawn on it. A work authorization order covering all aspects of the desired denture must be given to the technician if the partial denture is being fabricated in a dental laboratory. Anything less will compromise quality of the partial denture. www.indiandentalacademy.com

Dental Laboratory Procedures Fixed Partial Dentures [PDF]

Removable partial dentures usually consist of replacement teeth attached to pink or gum-colored plastic bases. Depending on your needs, your dentist will design a partial denture for you. A partial denture may have a metal framework and clasps that connect to your teeth, or they can have other connectors that are more natural looking.

American Dental Association - Removable Partial Dentures

Dental clinic and laboratory will not be in one place Sometimes in different cities Thus work authorization form acts as a medium of communication; the clinician determines a specific path of insertion and removal for the partial denture. This path is recorded by placing tripod marks on the diagnostic cast.
