Reinforce your understanding throughout the course. Clear topic summaries with sample questions and answers will help you improve your exam technique to achieve higher grades. Written by experienced examiner Mark Gavin, this Student Guide for Economics: - Identifies the key content you need to know with a concise summary of topics examined in the AS and A-level specifications - Enables you to measure your understanding with exam tips and knowledge check questions, with answers at the end of the guide - Helps you to improve your exam technique with sample answers to exam-style questions - Develops your independent learning skills with content you can use for further study and research

Get your best grades with this exam-focused text that will guide you through the content and skills you need to prepare for the exam. Manage your own revision with step-by-step support from experienced examiner Quintin Brewer. Use specific examples to place economic theory in a real-world context. With My Revision Notes: Edexcel A-level Economics, apply economic terms accurately with the help of definitions and key

words. - Plan and pace your revision with the revision planner - Use the expert tips to clarify key points - Avoid making typical mistakes with expert advice - Test yourself with end-of-topic questions and answers and tick off each topic as you complete it - Get exam ready with last minute quick quizzes at www.hoddereducation.co.uk/myrevisionnotes

Develop your students' knowledge of economic themes 3 and 4 of the Edexcel specification and help them put theory into context, with focused case studies and practice activities. Maximise their potential in Edexcel A level Economics, with topic-by-topic guidance from Peter Smith: - Keep your students' up to date with the rapidly changing world: new exciting case studies will help them analyse and evaluate - Build their quantitative skills with worked examples and practice activities throughout the book - Ensure they can explain key economic concepts and issues accurately and effectively: learn the key terms throughout the text and in the theme-by-theme glossaries Feel confident in their exam skills: put what they learn into practice with activities and practice questions

This Third edition for Cambridge International AS and A Level Economics syllabus (9708) is thoroughly updated for first examination from 2016.

This revision and practice book is a useful way for students to prepare effectively for their AS Economics exams. It covers every Unit from the AQA, Edexcel and OCR courses, with clear, concise explanations and examples that make the subject easy to understand. There are also practice questions and exam-style questions for every topic (with outline answers at the back), plus advice for getting top marks in the AS exams.

Exam Board: Edexcel Level: GCSE Subject: Business First Teaching: September 2017 First Exam: June 2019 Endorsed for Edexcel Let Ian Marcouse successfully steer you through the new specification with his proven and popular approach to Business; clear content coverage is enhanced by numerous real-life examples to create a course that engages, motivates and develops every student. - Breaks down the content of the 2017 specification into clear, accessible explanations of important concepts and theories - Helps students apply their knowledge to a range of real business examples, issues and contexts, supported by 'Talking Points' that encourage critical and commercial thinking - Improves quantitative, investigative, analytical and evaluation skills through end-of-chapter exercises - Builds students' confidence approaching their exams as they practise calculation, short answer and extended-writing questions with stimulus materials - Boosts students' vocabulary and supports revision with definitions of key terminology for each topic

Endorsed by Cambridge International Examinations, Cambridge O Level Economics Workbook is designed to help learners develop their understanding of economics, to build up skills and to enable them to assess their progress. The workbook can be used in conjunction with the Cambridge O Level Economics textbook (ISBN 9781107612358) by the same author but may also be used independently. It is divided into eight sections which correspond to the sections of the syllabus and the textbook. Each section, in turn, is divided into ten parts.

If you struggle with index numbers or calculations of elasticity, this is the book for you. This textbook companion will help improve your essential maths skills for economics, whichever awarding body specification you're following. You can use it throughout your course, whenever you feel you need some extra help. - Develop your understanding of both maths and economics with all worked examples and questions within a economics context - Improve your confidence with a step-by-step approach to every maths skill - Measure your progress with guided and non-guided questions to see how you're improving - Understand where you're going wrong with full worked solutions to every question - Feel confident in expert guidance from experienced teacher Peter Davis and examiner Tracey Joad, reviewed by Colin Bamford, Professor of Transport and Logistics at University of Huddersfield and former Chief Examiner

Covers the Cambridge IGCSE syllabus (0455) and the Cambridge O Level syllabus (2281), first examination from 2020. This series helps students understand economic theory, terminology and principles. It matches the Cambridge IGCSE and O Level Economics syllabuses. The coursebook helps students apply tools of economic analysis, make judgements on economic issues, use basic economic numeracy and literacy, and take greater part in decision-making processes in everyday life. Sample questions provide opportunities for students to develop their evaluative skills. It provides a foundation for advanced study in Economics such as A Level. Answers to the coursebook and workbook questions are in the teacher's resource.

The routine jobs of yesterday are being replaced by technology and/or shipped off-shore. In their place, job categories that require knowledge management, abstract reasoning, and personal services seem to be growing. The modern workplace requires workers to have broad cognitive and affective skills. Often referred to as "21st century skills," these skills include being able to solve complex problems, to think critically about tasks, to effectively communicate with people from a variety of different cultures and using a variety of different techniques, to work in collaboration with others, to adapt to rapidly changing environments and conditions for performing tasks, to effectively manage one's work, and to acquire new skills and information on one's own. The National Research Council (NRC) has convened two prior workshops on the topic of 21st century skills. The first, held in 2007, was designed to examine research on the skills required for the 21st century workplace and the extent to which they are meaningfully different from earlier eras and require corresponding changes in educational experiences. The second workshop, held in 2009, was designed to explore demand for these types of skills, consider intersections between science education reform goals and 21st century skills, examine models of high-quality science instruction that may develop the skills, and consider science teacher readiness for 21st century skills. The third workshop was intended to delve more deeply into the topic of assessment. The goal for this workshop was to capitalize on the prior efforts and explore strategies for assessing the five skills identified earlier. The Committee on the Assessment of 21st Century Skills was asked to organize a workshop that reviewed the assessments and related research for each of the five skills identified at the previous workshops, with special attention to recent developments in technology-enabled assessment of critical thinking and problem-solving skills. In designing the workshop, the committee collapsed the five skills into three broad clusters as shown below: Cognitive skills: nonroutine problem solving, critical thinking, systems thinking Interpersonal skills: complex communication, social skills, team-work, cultural sensitivity, dealing with diversity Intrapersonal skills: self-management, time management, self-development, self-regulation, adaptability, executive functioning Assessing 21st Century Skills provides an integrated summary of the presentations and discussions from both parts of the third workshop.
