Poe is best known for his poetry and short stories, particularly his tales of mystery and the macabre. He is widely regarded as a central figure of romanticism in the United States and of American literature as a whole, and was one of the earliest practitioners of the country's short story. He is also generally considered the inventor of the detective fiction genre and is further credited with contributing to the emerging genre of science fiction.

Edgar Allan Poe has long been viewed as an artist who was hopelessly out of step with his time. But as Terence Whalen shows, America's most celebrated romantic outcast was in many ways the nation's most representative commercial writer. Whalen explores the antebellum literary environment in which Poe worked, an environment marked by economic conflict, political strife, and widespread foreboding over the rise of a mass audience. The book shows that the publishing industry, far from being a passive backdrop to writing, threatened to dominate all aspects of literary creation. Faced with financial hardship, Poe desperately sought to escape what he called "the magazine prison-house" and "the horrid laws of political economy." By placing Poe firmly in economic context, Whalen unfolds a new account of the relationship between literature and capitalism in an age of momentous social change. The book combines pathbreaking historical research with innovative literary theory. It includes the first fully-documented account of Poe's response to American slavery and the first exposé of his plot to falsify circulation figures. Whalen also provides a new explanation of Poe's ambivalence toward nationalism and exploration, a detailed inquiry into the conflict between cryptography and common knowledge, and a general theory of Poe's experiments with new literary forms such as the detective story. Finally, Whalen shows how these experiments are directly linked to the dawn of the information age. This book redefines Poe's place in American literature and casts new light on the emergence of a national culture before the Civil War.

Of course we could also say that he would not have had it so Difficult not to have had such a complex way of being, after all, he was lucky to be welcomed by a wealthy (very wealthy) couple, who paid for his education in the best schools (also in Europe) and who, at except for his mother, he adored him. But neither Poe was an easy guy nor his father an understanding soul, the train crash was brutal and for history there is what we know that one and the other did and that we already have more details here.

First published between 1982 and 1983, this series examines the peculiarly American cultural context out of which the nation's literature has developed. Covering the years from 1830 to 1865, this second volume of American Literature in Context examines twelve major American writers of the three decades before the Civil War, including Edgar Allan Poe, Ralph Waldo Emerson, Henry David Thoreau, Herman Melville and Walt Whitman. The book also analyses the writing of two contemporary historians, an intellectual journalist and Abraham Lincoln. Among the major themes discussed the religious heritage of New England Transcendentalism, sectional rivalries, tensions between self-culture and social awareness, and the widening gulf between the idea of national destiny and the fact of growing disunity. In addition, the dominant literary forms of the period - sermon, essay, travelogue - are related to the common cultural assumptions of the age. This book will be of interest to those studying American literature and American studies.
