Engineering Drawing and Design, combines engineering graphics and drafting in one accessible product. Technical drafting, like all technical areas, is constantly changing; the computer has revolutionized the way in which drawings and parts are made. This 4-color text covers the most current technical information available, including graphic communication, CAD, functional drafting, material positioning, numerical control, electronic drafting, and metrication, in a manner useful to both the instructor and student. The authors synthesize, simplify, and convert complex drafting standards and procedures into understandable instructional units.

Health and Development presents a broad and detailed description of the multifaceted aspects of health and development across the globe. People are living longer, their lifestyles are changing and so too are the diseases from which they suffer. Recession in the North and debt servicing in the South have reduced public expenditure on health and welfare. The links between regional, economic and environmental factors and the health of a population are becoming clearer. Does development mean a

longer life of lower quality? Always alive to both the global and the local implications, the authors focus in particular on the critical issues surrounding environmental impact, the interaction of poverty and health, socio-cultural factors in HIV/AIDS transmission, the use of traditional and community health care resources and women's health.

This brand new textbook by one of the leading engineering authors covers basic sheet-metal fabrication and welding engineering principles and applications in one volume - an unrivalled comprehensive coverage that reflects current working and teaching practice. It is fully up-to-date with the latest technical information and best practice and also includes chapters on non-technical but equally essential subjects such as health and safety, personal development and communication of technical information. Roger Timings covers these areas of mechanical engineering and workshop practice in a highly practical and accessible style. Hundreds of illustrations demonstrate the practical application of the procedures described. The text includes worked examples for calculations and key points to aid revision. Each chapter starts with learning outcome summaries and ends with exercises which can be set as assignments. The coverage is based on the SEMTA National Occupational Standards which makes this book applicable to a wide range of courses and ensures it also acts as a vital ongoing reference source in day-to-day working practice. All students, trainees and apprentices at up to and including Level 3 will find this book essential reading, particularly those taking: Level 2 NVQs in Performing Engineering Operations Level 2 and 3 NVQs in Fabrication and Welding Engineering Level 2 NVQs in Mechanical Manufacturing Engineering C&G 2800 Certificate and Level 3 Diplomas in Engineering and
