[EPUB] Patient Satisfaction Introduction
Patient satisfaction is a measure of the extent to which a patient is content with the health care which they received from their health care provider . In evaluations of health care quality, patient satisfaction is a performance indicator measured in a self-report study and a specific type of customer satisfaction metric.

Patient satisfaction - Wikipedia
Introduction. Patient satisfaction is a highly desirable outcome of clinical care in the hospital and may even be an element of health status itself (1). A patient's expression of satisfaction or dissatisfaction is a judgment on the quality of hospital care in all of its aspects. Whatever its strengths and limitations, patient satisfaction is an indicator that should be indispensable to the assessment of the quality of care in hospitals.

Patient Satisfaction: the Hospitalist's Role | The Hospitalist
INTRODUCTION Patient satisfaction is a relative phenomenon, which has been around since 1960's but active research on the topic was initiated in late 1970's and early 1980's. This led to the replacement of the idea of 'quantity of life' by a more patient centered concept of 'quality of life'1.
