This cookbook contains recipe after recipe that allow you to harness the full power of the native plug-in effects in the After Effects application. In a step-by-step manner, author Chad Perkins guides you through the creation and application of each and every native plug-in effect available for use in the AE toolset. The book also shows you how each can be used optimally in your media project, when and why it makes sense to use each, and also how to combine multiple effects. From color correction effects to distortion effects to stimulation effects and all in between, this book puts the full power of the AE plug-in effects in your hands. It shows you how to create, among others: - the shatter effect - the fractal noise effect - the glow effects - the Particle playground effect - the 3D Channel Extract effect - the Colorama effect

Many people want to help bring about changes in their neighborhoods, workplaces, and communities. Leaders and scholars of change efforts are likewise eager for insights into what makes some organizations and coalitions capable of building and exercising power. Why are some groups successful in making changes in policies and systems and in sustaining their momentum over time, while others struggle or never really get off the ground? With Community Power and Empowerment, Brian D. Christens brings the most comprehensive analysis of empowerment theory yet conducted to bear on these questions, taking aim at many of the longstanding weaknesses and ambiguities of empowerment theory, research, and practice. For example, one major hindrance is that most notions of empowerment have not been coherently connected with community power. In addition, research has emphasized psychological aspects of empowerment over organizational processes, and has neglected community empowerment processes to an even greater extent. By linking empowerment and community power, Christens constructs a holistic framework for assessing and comparing community-driven change efforts. This book offers new guidance for inquiries into outcomes and impacts of empowerment processes on health and well-being, providing a resource for researchers, organizational leaders, practitioners, and anyone interested in collective action for change.

"A startling new philosophy and practical guide to getting the most out of your money-and out of life-for those who value memorable experiences as much as their earnings"--

This book will inspire and spark grassroots action to address the inequitable impacts of climate change, by showing how this can be tackled and the many benefits of doing so. With contributions from climate activists and engaged young authors, this volume explores the many ways in which people are proactively working to advance climate justice. The book pays special attention to Canada and the Great Lakes watershed, showing how the effects of climate change span local, regional, and global scales through the impact of extreme weather events such as floods and droughts, with related economic and social effects that cross political jurisdictions. Examining examples of local-level activism that include organizing for climate-resilient and equitable communities, the dynamic leadership of Indigenous peoples (especially women) for water and land protection, and diaspora networking, Local Activism for Global Climate Justice also provides theoretical perspectives on how individual action relates to broader social and political processes. Showcasing a diverse range of inspirational and thought-provoking case studies, this book will be of great interest to students and scholars of climate justice, climate change policy, climate ethics, and global environmental governance, as well as teachers and climate activists.

The current leading cause of visual impairment among children is not a disease or condition of the eyes, but cortical visual impairment (CVI)-also known as cerebral visual impairment-in which visual dysfunction is caused by damage or injury to the brain. The definition, nature, and treatment of CVI are the focus of great concern and widespread debate, and this complex condition poses challenges to professionals and families seeking to support the growth and development of visually impaired children. On the basis of more than 30 years' experience in working with hundreds of children of all ages with CVI, Christine Roman-Lantzy has developed a set of unique assessment tools and systematic, targeted principles whose use has helped children learn to use their vision more effectively. This one-of-a-kind resource provides readers with both a conceptual framework with which to understand working with CVI and concrete strategies to apply directly in their work.

The Congressional Record is the official record of the proceedings and debates of the United States Congress. It is published daily when Congress is in session. The Congressional Record began publication in 1873. Debates for sessions prior to 1873 are recorded in The Debates and Proceedings in the Congress of the United States (1789-1824), the Register of Debates in Congress (1824-1837), and the Congressional Globe (1833-1873)
