Cut the flesh entirely from the bones in small pieces, and put it into a stew-pan with two quarts of water. His wife has left him, his father is sinking into dementia, and Marcos tries not to think too hard about how he makes a living. After all, it happened so quickly. First, it was reported that an infectious virus has made all animal meat poisonous to humans. Then governments initiated the "Transition." Now, eating human meat—"special meat"—is legal. Marcos tries to stick to numbers, consignments, processing. Then one day he's given a gift: a live specimen of the finest quality. Though he's aware that any form of personal contact is forbidden on pain of death, little by little he starts to treat her like a human being. And soon, he becomes tortured by what has been lost—and what might still be saved.

"Groundbreaking look at slaves as commodities through every phase of life, from birth to death and beyond, in early America The Price for Their Pound of Flesh is the first book to explore the economic value of enslaved people through every phase of their lives--including from before birth to after death--in the American domestic slave trades. Covering the full "life cycle" (including preconception, infancy, childhood, adolescence, adulthood, the senior years, and death), historian Daina Berry shows the lengths to which slaveholders would go to maximize profits. She draws from over ten years of research to explore how enslaved people responded to being appraised, bartered, and sold. By illuminating their lives, Berry ensures that the individuals she studies are regarded as people, not merely commodities. Analyzing the depth of this monetization of human property will change the way we think about slavery, reparations, capitalism, and nineteenth-century medical education"--
