An encyclopedia describes all aspects of world culture, broken down into six regional categories, discussing the art, dance, fashion, food, pastimes, periodicals, recreation, and transportation of each region.

This book features a selection of the best papers presented at two SIEV seminars held in Venice, Italy, in September 2017 and 2018, in the context of the Urbanpromo Green events. Bringing together experts from a diverse range of fields – economics, appraisal, architecture, energy, urban planning, sociology, and the decision sciences – and government representatives, the seminars encouraged reflections on the role of future cities in terms of sustainable development, with a particular focus on improving collective and individual well-being. The book provides a multidisciplinary approach to contemporary green urban agendas and urban sustainability, and addresses the demand for policies and strategies to strengthen resilience through concrete measures to reduce energy consumption, mitigate pollution, promote social inclusion and create urban identity.

This edition includes Italian libretto along with an English line by line translation for the opera goer to use. Follow the exquisitely beautiful Don Pasquale and understand every word with this unique edition.

After decades of economic integration and EU enlargement, the economic geography of Europe has shifted, with new peripheries emerging and the core showing signs of fragmentation. This book examines the paths of the core and peripheral countries, with a focus on their diverse productive capabilities and their interdependence. Crisis in the European Monetary Union: A Core-Periphery Perspective provides a new framework for analysing the economic crisis that has shaken the Eurozone countries. Its analysis goes beyond the short-term, to study the medium and long-term relations between ('core') countries (particularly Germany) and Southern European ('peripheral') countries. The authors argue that long-term sustainability means assigning the state a key role in guiding investment, which in turn implies industrial policies geared towards diversifying, innovating and strengthening the economic structures of peripheral countries to help them thrive. Offering a fresh angle on the European crisis, this volume will appeal to students, academics and policymakers interested in the past, present and future construction of Europe.

Italian comedians attracted audiences to performances at every level, from the magnificent Italian, German and French court festival appearances of Orlando di Lasso or Isabella Andreini, to the humble street trestle lazzi of anonymous quacks. The characters they inspired continue to exercise a profound cultural influence, and an understanding of the commedia dell arte and its visual record is fundamental for scholars of post-1550 European drama, literature, art and music. The 340 plates presented here are considered in the light of the rise and spread of commedia stock types, and especially Harlequin, Zanni and the actresses. Intensively researched in public and private collections in Oxford, Munich, Florence, Venice, Paris and elsewhere, they complement the familiar images of Jacques Callot and the Stockholm Recueil Fossard within a framework of hundreds of significant pictures still virtually unknown in this context. These range from anonymous popular prints to pictures by artists such as Ambrogio Brambilla, Sebastian Vranck, Jan Bruegel, Louis de Caulery, Marten de Vos, and members of the Valkenborch and Francken clans. This volume, essential for commedia dell arte specialists, represents an invaluable reference resource for scholars, students, theatre practitioners and artists concerned with commedia-related aspects of visual, dramatic and festival culture, in and beyond Italy."

In the second edition of the definitive account of Igor Stravinsky's life and work, arranged in two separate sections, Eric Walter White revised the whole book, completing the biographical section by taking it up to Stravinsky's death in 1971. To the list of works, the author added some early pieces that have recently come to light, as well as the late compositions, including the Requiem Canticles and The Owl and the Pussycat. Four more of Stravinsky's own writings appear in the Appendices, and there are several important additions to the bibliography.

This new edition (last, 1992) includes entries on some 500 musicians who were not included in the eighth edition (such as violin virtuoso Sarah Chang) and updates many others (such as composer John Cage, who died after the 8th edition was published). As before, entries also include musicians and composers of the 1800s and artists from other musical genres whose work has significantly influenced 20th century classical music. A glossary of terms is included at the end of the volume. c. Book News Inc.
