The term 'Fertile Crescent' is commonly used as shorthand for the group of territories extending around the Rivers Tigris and Euphrates. Here it is assumed to consist of Syria, Lebanon, Jordan, Iraq and Palestine. Much has been written on the history of these countries which were taken from the Ottoman empire after 1918 and became Mandates under the League of Nations. For the most part the histories of these countries have been handled either individually or as part of the history of Britain or France. In the first instance the emphasis has normally been on the development of nationalism and local resistance to alien control in a particular territory, leading to the modern successor state. In the second most studies have concentrated separately on how either France or Britain handled the great problems they inherited, seldom comparing their strategies. The aim of this book is to see the region as a whole and from both the European and indigenous points of view. The central argument is that the mandate system failed in its stated purpose of establishing stable democratic states out of what had been provinces or parts of provinces within the Ottoman empire. Rather it generated basically unstable polities and, in the special case of Palestine, one totally unresolved, and possibly unsolvable, conflict. The result was to leave the Middle East as perhaps the most volatile part of the world in the later twentieth century and beyond. The main purpose of the book is to examine why this was so.

Britain in the Middle East provides a comprehensive survey of British involvement in the Middle East, exploring their mutual construction and influence across the entire historical sweep of their relationship. In the 17th century, Britain was establishing trade links in the Middle East, using its position in India to increasingly exclude other European powers. Over the coming centuries this commercial influence developed into political power and finally formal empire, as the British sought to control their regional hegemony through military force. Robert Harrison charts this relationship, exploring how the Middle East served as the launchpad for British offensive action in the World Wars, and how resentment against colonial rule in the region led ultimately to political and Islamic revolutions and Britain's demise as a global, imperial power.

The Indian military setback against the Chinese attack in 1962 was high time for an honest soul-searching. Quite a few books written by Army officers have tried to tell their version of the untold story. Brig. Dalvi's account of the Sino-Indian War is by far the most remarkable and authentic. He was present in the theatre of war throughout, commanded a brigade and was held captive by the Chinese for seven months. In discussing the day-to-day events from 8 September to 20 October 1962 the author graphically tells the truth which only an actual participant could experience and know. The background of the war is drawn from his first-hand information as a high-ranking commander.

MobiSec 2010 was the second ICST conference on security and privacy in mobile information and communication systems. With the vast area of mobile technology research and application, the intention behind the creation of MobiSec was to make a small, but unique contribution to build a bridge between top-level research and large scale application of novel kinds of information security for mobile devices and communication.

Communities Dominate Brands: Business and marketing challenges for the 21st century is a book about how the new phenomenon of digitally connected communities are emerging as a force to counterbalance the power of the big brands and advertising. The book explores the problems faced by branding, marketing and advertising facing multiple radical changes in this decade. Communities Dominate Brands discusses how disruptive effects of digitalisation and connectedness introduce threats and opportunities. The authors compellingly illustrate how modern consumers are forming communities and peer-groups to pool their power resulting in a dramatic revolution of how businesses interact with their customers. The book provides practical guidance of how to move from obsolete interruptive advertising to interactive engagement marketing and community based communications, with dozens of real business examples from around the world. Communities Dominate Brands addresses its topic from a marketing (including advertising and branding) perspective and maintains a rigorous focus on business and profit dimensions of the issues involved.The book discusses such recent phenomena as blogging, virtual environments, mobile phone based swarming and massively multiplayer games. The book introduces a new generation of consumers called Generation-C (for Community). The book also discusses such new concepts as the Connected Age, Reachability, the Four C's, Alpha Users, and introduces Communities as an unavoidable new element into the traditional communication model. Combining the digital trends, modern management theories, and emerging new customer behaviour, Communities Dominate Brands arrives to its conclusion, that traditional marketing methods are increasingly ineffective and even becoming counterproductive. The power of the brands and the abuses by marketing have created a vacuum for a counterbalance, and digitally connected communities, the blogosphere, gamers, and especially the always-on connectedness of those on mobile phone networks, are emerging as the counterforce to redress the balance. The power of smart mobs and digitally enlightened communities will react rapidly to marketing excesses as the natural force balancing the power of the brands.The way a business can and must interact with the powerful new communities is through engagement marketing, by enticing the communities to interact with the brands. Communities Dominate Brands covers the major changes taking place in business and industry worldwide from leading digitally connected societies such as Finland, Korea, Japan, Hong Kong, UK and the USA. The authors discuss the business relevance of such community related technologies and phenomena such as blogging, CANs, iPod, MMOGs, MVNOs, PVRs, Ringing Tones, SMS text messaging, swarming, VOD. This is the definitive business book on the impact of new technologies, not explaining how technology works, but showing what businesses need to do to make money in the new digitally converging environment. Communities Dominate Brands analyses early successes of engaging communities by global brands such as Adidas, Apple, Audi, BBC, Boeing, Coca Cola, eBay, Ford, Google, Guinness, Hush Puppies, Lonely Planet, MTV, Nokia, Orange, Philips, Red Bull, Sony, Tesco, Tony & Guy, Vodafone, etc.The lessons are amplified with insights from rough punishment by communities suffered by Hutchison/Three networks, Kryptonite locks, Mazda, the Philippines Government, etc. Fully indexed, impeccably researched with documented sources, offering over 50 current business examples and over a dozen case studies, Communities Dominate Brands is a hands-on practical business handbook on how to adjust marketing to deal with communities. With tools such as the Four C's and Reachability, the authors provide a competitive head-start to all who want to achieve customer satisfaction and return business in the 21st century.

The Pocket PCT contains an elevation profile and important landmarks on the Pacific Crest Trail (PCT). Each chapter begins and ends at a common resupply location. The elevation profile is broken into ten-mile segments, showing the trail's elevation in feet. Water sources, landmarks, roads and trails are indicated above the elevation profile line. Additional important town information is also provided. The mileages are compatible with Halfmile maps and the Guthook's Pacific Crest Trail Guide app (iPhone & Android). The book is lightweight (4.9 ounces), compact (5 by 8 inches) and just over a quarter inch thick.

When Jake succeeds in persuading his family to embark on a sailing-camping holiday on a Tasmanian island, he is mostly interested in pirate fantasies and his home-built Optimist dinghy. But he does not plan on the events which are to leave him alone with his brother and sister. The children's idealistic notions are challenged by several less-than-friendly visitors who introduce some serious concerns. Ultimately, after being forced to dig deep into their personal reserves, the treasures they all gain from their experiences are rather different from the ones Jake has set out to find.
