This includes assessment of skin color, moisture, temperature, texture, mobility and turgor, and skin lesions. Inspect and palpate the fingernails and toenails, noting their color and shape and whether any lesions are present. Skin lesions can be categorized as primary or secondary, although the distinction isn't always clear.

The first time I did a skin assessment I was in an absolute panic as to how to fill out the paper. I saw spots all up and down the arm (and at the time didn't even realize they were age spots). There was a little scratch with some skin peeling and I wasn't sure how to document that? I put small skin tear, but I don't think that is a skin tear.
